Belden IBDN Copper Systems Provide Reliable, End-to-End Networking Performance

Belden understands that cabling is the core foundation of every network – its ability to provide high performance, reliable transmission is essential for carrying out day-to-day business operations. From critical data center links that connect network switches and servers, to horizontal and backbone links that deliver voice, data and video for a wide range of networking, communications, audio-visual, security and building management applications, Belden has the end-to-end copper cabling system to meet your current networking challenges while providing the bandwidth and scalability for the needs of the future.

Representing Networking Leadership at Every Turn

Five different levels of Belden IBDN Copper Systems are offered to meet customers' specific needs.

Belden IBDN Copper Systems represent networking leadership at every turn, providing top-performing structured cabling systems that reduce downtime, ease deployment and facilitate migration to advanced networking technologies and converged building systems. Designed with innovative technologies that provide beyond-standards performance, Belden IBDN Copper Systems are available in five different levels to meet your specific needs — no matter what your application, your environment or your plans. With verified performance through comprehensive, independent third-party testing, Belden IBDN Copper Systems are available with the following wide range of components — each tuned to its other system components to provide optimum, end-to-end system performance.

- Pre-Terminated and Field-Terminated Systems
- Nonbonded-Pair and Bonded-Pair cable and assemblies
- Unshielded and shielded cable, assemblies and components
- Ultra High-Density, AngleFlex and standard patch panels
- KeyConnect and MDVO-Style modular jacks
- Patch cords, pigtailed and pre-terminated cabling assemblies
- MediaFlex, KeyConnect and MDVO-Style workstation outlet systems
- BIX and 110 IDC cross-connect systems.
- Indoor, outdoor and specialty backbone and riser cables

The following is a recap of each of the five Belden IBDN Copper Systems.

IBDN 10GX System

The IBDN 10GX System is an end-to-end copper system designed with dynamic enabling technologies to support the most demanding current and future high-end applications with performance beyond the TIA/EIA Category 6A standard. With a guaranteed 625 MHz of usable bandwidth for 10BASE-T applications and the highest supported frequency for broadband video at 860 MHz, the IBDN 10GX System is an ideal

long-term investment that will outlast several equipment and application upgrades. Combined with a host of patch panels, assemblies, connectors and accessories, as well as a pre-terminated system, the IBDN 10GX System is the ideal solution for any current and future data center or horizontal cabling system.

IBDN 4800 System

The highest performing Category 6 system available, the IBDN 4800 System provides guaranteed bandwidth to 300 MHz with exceptional signal power and signal-to-noise performance that tops TIA/EIA Category 6 requirements. From transmitting large volumes of data throughout the LAN and data center, to today's advanced applications like Voice over IP (VoIP), video over IP, Power over Ethernet (PoE) Plus and IP-based security and building management systems, the IBDN 4800 System supports a variety of environments and applications. With a wide range of components and accessories, the end-to-end IBDN 4800 System offers the longest operational life span of any Category 6 system.

IBDN 3600 System

The IBDN 3600 System offers the best price-performance ratio of any end-to-end Category 6 system on the market. With guaranteed performance to 280 MHz, the IBDN 3600 System offers headroom beyond the TIA/EIA Category 6 standard to support any current IP-based application, including VoIP, PoE, wireless access points and building automation systems. Enhanced crosstalk and impedance performance, combined with a compact size and available pre-terminated system for rapid data center deployment, makes the IBDN 3600 System the most cost-effective solution for high-traffic and high bit-rate applications throughout the LAN environment.

One Enterprise.
One Infrastructure.
One Partner.

IBDN 2400 System

The IBDN 2400 System offers moderate communications performance for general business applications and transactions, including advanced file sharing and downloads. It offers a guaranteed bandwidth of 250 MHz to support 10/100/1000BASE-T applications with enhanced, error-free Category 6 performance. With cables, modular jacks, cords, patch panels and a cross-connect system, the IBDN 2400 System is an ideal market-entry solution for businesses ready for reliable end-to-end Category 6 performance.

IBDN 1200 System

For networks requiring only Category 5e performance, the IBDN 1200 System is the best performing Category 5e system available. The IBDN 1200 System exceeds all requirements for Category 5e performance with guaranteed bandwidth to 160 MHz—more bandwidth than typical Category 5e systems. Ideal for budget-conscious and short-term investments, the IBDN 1200 System is robust enough to support a variety of basic business applications in standard environments, including basic PoE.

Belden IBDN Copper Systems – Performance and Component Selection Matrix

IBDN System	10GX System	4800 System	3600 System	2400 System	1200 System
Performance Standard	Category 6A	Category 6	Category 6	Category 6	Category 5e
Available Bandwidth	625 MHz	300 MHz	280 MHz	250 MHz	160 MHz
Cable Selection	10GX Series	DataTwist 4800 Series	DataTwist 3600 Series	DataTwist 2400 Series MediaTwist Series	DataTwist 1200 Series
Connectivity Selection	10GX IDC Cross-Connect	GigaBIX Cross-Connect			BIX and 110 Cross-Connect
	10GX Patch Panels	CAT6+ Patch Panels			CAT5E Patch Panels
	10GX Modular Jacks	CAT6+ Modular Jacks			CAT5E Modular Jacks
	10GX Modular Cords	CAT6+ Modular Cords			CAT5E Modular Cords
KeyConnect and Flex Modular Patch Panels MediaFlex, KeyConnect, Interface and MDVO Outlet Hardware <i>(Configurable with appropriate modules)</i>					

Top-quality Flagship Innovations Provide the Ultimate Value

Backed by years of field-proven telecommunications experience, Belden IBDN Copper System components include several innovative technologies designed to ensure cost-effective, easy deployment and maximum performance and reliability, while meeting current and future needs for capacity and scalability. These products are designed with the same focus on quality and performance found in Belden's complete product line.

Belden Bonded-Pair Cables

Available for each IBDN Copper System, Belden Bonded-Pair Cables feature a patented design that bonds the individual conductors along their longitudinal axis for extremely uniform spacing that maintains pair geometry and consistent electrical performance. With higher pulling tensions and tighter bend radii, Belden Bonded-Pair Cables are better suited to withstand the rigors of real-world installations and accommodate high-density data center applications that experience a great deal of cable bending in and around patch panels. Because Belden Bonded-Pair Cables avoid gaps along the twisted pairs, they provide improved return loss and balance performance that makes them less susceptible to electromagnetic and radio frequency interference (EMI/RFI) in noisy environments. This innovative Belden technology is ideal for high frequency 10 Gigabit and broadband video applications, as well as any mission-critical situation where dropped signals are not an option.

Pre-Terminated Cabling Systems

Ideal for data centers where time, reliability and performance are critical, Belden Pre-Terminated Cabling Systems are easy to configure, easy to order and easy to install. With an intuitive plug-and-play action, built-in reliability that virtually eliminates testing, and simple reusable components, Belden's Pre-Terminated Cabling Systems provide superior performance, save significant time and money and offer energy and waste savings. At the heart of these systems are two core components — pre-terminated cable assemblies and RJ45 modular couplers. The pre-terminated cable assemblies are a 6-cable bundle terminated with smaller footprint RJ45 plugs that provide easy pulling, routing, cable management and connection. Compatible with Belden's full line of KeyConnect modular patch panels, the RJ45 modular couplers are RJ45-to-RJ45 inline couplers designed to meet the performance requirements of a single plug-jack connection while offering the inherent simplicity of a true plug-and-play solution. The Belden Pre-Terminated Cabling Systems are available in unshielded and shielded 10GX Pre-Terminated Cabling Systems for 10 Gigabit applications and in the 3600 Pre-Terminated Cabling Solution for the ultimate in Category 6 performance.

There's a Belden
IBDN Copper System
that's right for you.

KeyConnect Modularity

Belden's KeyConnect System includes a wide range of KeyConnect patch panels, faceplates, adapters and boxes, combined with a complete line of KeyConnect Modules, including KeyConnect Modular Jacks available in 10GX, CAT6+ and CAT5E to suit any network performance level. Each modular component of the KeyConnect series seamlessly fits together to accommodate any application—from the data center to the workstation. Designed with superior signal transmission performance, the compact KeyConnect Modules can be easily inserted and removed from any keystone-style opening, providing design flexibility, reduced installation time and the ability to reconfigure as needs change. For data centers and telecommunications rooms, modular KeyConnect Patch Panels can be preloaded or configured using any KeyConnect Modules for any level of density, including a 48-port/1U configuration. The modules can also be used with front-loading Belden MediaFlex Outlets for mixing and matching with Multimedia

Modules. KeyConnect components come in a variety of colors and styles, including more than 19 colors of jacks, stainless steel faceplates, single-gang and double-gang configurations, and boxes equipped with protective shutters.

Best Design and Installation Partners

Well positioned as a leading single-source provider, Belden's global network of top-quality distribution and fully-trained installation partners provide comprehensive local and global support from design, delivery and installation to post-installation support. Belden recruits and qualifies only the best design and installation partners as our authored Certified System Vendors (CSVs). Belden invests heavily in evaluating, training and qualifying our partners so they have the knowledge and expertise necessary to ensure that the design and installation of each Belden IBDN system is optimized for the required standards, technology environment and lifespan of the network.

Best-in-Class Support and Warranties

All Belden IBDN Systems are backed by expert service and technical support and a commitment to delivering high-performance, reliable transmission solutions. Belden backs certified IBDN systems with two unique best-in-class warranties for complete peace of mind — a 25-Year Product Warranty and a Lifetime Application Assurance Program. From the date of installation, the 25-Year Product Warranty warrants against defects in materials and workmanship and guarantees components to meet or exceed all applicable standards. Under the Lifetime Application Assurance Program, Belden warrants that each certified IBDN System will deliver its specified throughput rate and minimum bandwidth capabilities and be capable of operating the applications that the system was originally designed to support, as well as any new applications, for the lifetime of the installed system.

10GX Shielded Patch Panels and Shielded Modular Jacks	17
10GX Shielded Modular Cords	18
10GX Shielded Pre-Terminated Cabling System	19

The copper cabling system that does it all, the IBDN 10GX System supports the most demanding current and future high-end applications with performance beyond the Category 6A standard. The system is comprised of 10GX System Cables, preloaded or modular 10GX Patch Panels, 10GX Modular Jacks and 10GX Modular Cords. Together, these components form an end-to-end system that guarantees 625 MHz of usable bandwidth to support full implementation of 10GBASE-T applications and broadband video at 860 MHz. A truly long-term investment, the IBDN 10GX System is designed to outlast several equipment and application upgrades.

The IBDN 10GX System is available in a 10GX Pre-Terminated System that features proven modular components with superior performance and intuitive plug-and-play installation for saving significant time and money. For cross-connect and interconnect systems, the 10GX IDC System is a high-performance, space-saving modular connection system. For harsher EMI environments, the IBDN 10GX Shielded System and the 10GX Shielded Pre-Terminated System provide a higher degree of noise immunity in a true end-to-end shielded system that maintains shielding integrity throughout the entire system.

IBDN 10GX System is based on Belden's innovative enabling technologies.

RoundFlex cable design offers a smaller diameter cable (only .295") for higher density at the rack and easier handling through pathways.

MatriX IDC technology positions each IDC at a right angle to its adjacent IDC to cancel out Alien Crosstalk and provide stable high-performance in high-density environments.

X-Bar technology accurately positions each UTP pair prior to termination.

FleXPoint PCB technology positions the compensation circuitry in 10GX Modular Jacks directly at the plug's point of contact for better crosstalk performance.

Bonded-Pair technology offers uniform spacing of conductors for exceptional structural stability and superior electrical performance.

Dual-Flex PCB technology in the RJ45 Coupler of the 10GX Pre-Terminated Cabling Systems ensures an uninterrupted electrical path for enhanced reliability.

10GX UTP System Cable, 10 Gigabit Ethernet, Category 6A

Nonbonded-Pair and Bonded-Pair

The 10GX Cable delivers performance that goes beyond the ANSI/TIA/EIA 568-C.2 Category 6A standard. When used as the horizontal cable within the Belden IBDN 10GX System, it provides 625 MHz of proven channel bandwidth and a data rate of 10 Gigabits per second. This performance is made possible through the innovative RoundFlex™ design that serves to reduce alien crosstalk by randomizing the distance between the cables.

Applications:

- 10GBASE-T Full Power Implementation (IEEE 802.3an)

- 10GBASE-T Low Power Implementation (Short Reach Mode) (IEEE 802.3an)
- 1000BASE-T Applications (IEEE 802.3ab)
- Power Over Ethernet Plus - 2 pairs, up to 30 Watts or 4-pairs, up to 60 Watts (IEEE 802.3at)
- Power Over Ethernet - 2 pairs, up to 12.95 Watts (IEEE 802.3af)
- Broadband Video (CATV) & High Speed Internet (DOCSIS) over UTP up to 860 MHz
- High Temperature performance up to 50°C without length de-rating for 1000BASE-T and 100BASE-TX

10GX Patch Panels

Preloaded and Modular

The 10GX Patch Panel is a fully loaded patch panel designed to be used within the IBDN 10GX System. The 10GX Patch Panel features the revolutionary 10GX Connector, specifically designed to meet the difficult challenges of 10 Gb/s transmission. 10GX Patch Panels are available in high-density options such as 24 ports in 1U or 48 ports in 2U, but the phenomenal ANEXT performance of the 10GX Connector has allowed Belden to also support an ultra high-density option offering the 10GX Ultra High-Density Patch Panel supporting 48 ports in 1U. The unmatched Beyond 10G™ performance exceeds all parameters specified in the Category 6A standard. All performance characteristics including ANEXT, NEXT, FEXT, Insertion Loss and Return Loss have been set to guarantee transmission performance up to 625 MHz.

KeyConnect Patch Panels are robust all-metal modular patch panels that provide a flexible, versatile and high-density termination solution for Data Center and Telecommunications Room

installations. The modular KeyConnect Patch Panels are available in 24-port/1U, 48-port/2U, 72-port/2U and 48-port/1U configurations.

The KeyConnect Patch Panel series also includes the unique AngleFlex Patch Panel available in 24-port/1U and 48-port/2U configurations. Patent-pending removable angled inserts provide intuitive left, right or bi-directional patch cord routing and more efficient switch connection. Angled inserts eliminate the need for horizontal cable management, for a 27% space savings per rack.

The KeyConnect and AngleFlex panels can be configured using 10GX KeyConnect Modular Jacks or Multimedia Modules.

The Flex Patch Panel series is available in 24-port/1U and 48-port/2U configurations, and is designed to be populated using MDVO-Style 10GX Modular Jacks or Multimedia Modules.

10GX Modular Jacks

KeyConnect and MDVO-Style

The 10GX Module is a revolutionary punch down UTP connector designed to be used within the IBDN 10GX System. In order to achieve true 10G performance, Belden has designed the 10GX Module based on three revolutionary module technologies making the 10GX Module the most advanced 10G module available. The unmatched Beyond 10G™ performance exceeds all parameters specified in the Category 6A standard. All performance characteristics including ANEXT, NEXT, FEXT, Insertion Loss and Return Loss have been set to guarantee transmission performance up to 625 MHz.

The KeyConnect version has a keystone footprint, and is designed to be used with KeyConnect and AngleFlex Patch Panels and with KeyConnect and MediaFlex Workstation Outlets. The MDVO-Style is designed to be used with Flex Patch Panels as well as Interface and MediaFlex Workstation Outlets. The modular jacks can also be mixed and matched with a wide variety of adapters and boxes to suit practically any installation configuration for workstation outlet, consolidation point and telecommunications closet applications.

10GX MDVO-Style Modular Jack

10GX Modular Cord

10GX Modular Cords

Bonded-Pair Cords and Nonbonded-Pair Pigtails

The 10GX Modular Cords are 4-pair 23 AWG UTP modular cords designed to be used within the Belden IBDN 10GX System. Belden has designed the 10GX Modular Cord based on a patent-pending plug management bar design which allows for very good control of the internal plug NEXT. The Bonded-Pair patch cable design offers very good Alien crosstalk performance, while maintaining the important mechanical characteristics such as flexibility. The 10GX Modular Cords' design, with a very small footprint, makes them fully compatible with the highest density hubs that utilize RJ45 jack connections.

The 10GX Modular Cords are available in dark colors which match the horizontal cable colors and are also available in TIA/EIA-606 standard (pastel) colors. The unmatched performance exceeds all parameters specified in the Category 6A standard. All performance characteristics have been set to guarantee transmission performance up to 625 MHz.

- Exceeds TIA and ISO transmission and mechanical performance requirements
- Ordering code scheme to customize Bonded-Pair Patch Cord and Pigtail configurations

Modular Cord Configuration Matrices

10GX, CAT6+ and CAT5E Modular Cords

Patch Cords Part Number Example:

CA221306007 is 10GX Patch Cord, Bonded-Pair, 4-pair, 24 AWG Solid, CMP, T568A/B-T568A/B, Blue, 7 ft (2.1 m)

Performance	Cable	Termination	Standard Color	Length
10GX = CA	10GX Bonded-Pair, Solid, CMR = 21	T568A/B-T568A/B = 1	Brown = 01	1 ft (0.3 m) = 001
	10GX Bonded-Pair, Solid, CMP = 22		Red = 02	2 ft (0.6 m) = 002
CAT6+ = C6	C6/5 Bonded-Pair, Solid, CMR = 01		Orange = 03	3 ft (0.9 m) = 003
CAT5E = C5	C6/5 Bonded-Pair, Solid, CMP = 02		Yellow = 04	4 ft (1.2 m) = 004
			Green = 05	5 ft (1.5 m) = 005
			Blue = 06	6 ft (1.8 m) = 006
			Purple = 07	7 ft (2.1 m) = 007
			Gray = 08	8 ft (2.4 m) = 008
			White = 09	9 ft (2.7 m) = 009
			Black = 00	10 ft (3.0 m) = 010
				11 ft (3.4 m) = 011
			TIA 606 Color	12 ft (3.7 m) = 012
			Red = 12	13 ft (4.0 m) = 013
			Orange = 13	14 ft (4.3 m) = 014
			Yellow = 14	15 ft (4.6 m) = 015
			Green = 15	20 ft (6.1 m) = 020
			Blue = 16	25 ft (7.6 m) = 025
			Purple = 17	

These matrices can be used to build the part number for any Modular Cord configuration. Refer back to these matrices as needed, when designing Category 6 (Section Two) and Category 5e systems (Section Three).

Pigtails Part Number Example:

C601309025 is CAT6+ Pigtail, Bonded-Pair, 4-pair, 24 AWG Solid, CMR, T568B-Open, White, 25 ft (7.6 m)

Performance	Cable	Termination	Standard Color	Length
10GX = CA	10GX Bonded-Pair, Solid, CMR = 21	T568A-Open = 2	Brown = 01	15 ft (4.6 m) = 015
	10GX Bonded-Pair, Solid, CMP = 22	T568B-Open = 3	Red = 02	20 ft (6.1 m) = 020
CAT6+ = C6	C6/5 Bonded-Pair, Solid, CMR = 01		Orange = 03	25 ft (7.6 m) = 025
CAT5E = C5	C6/5 Bonded-Pair, Solid, CMP = 02		Yellow = 04	35 ft (10.6 m) = 035
	CA/C6/C5 NonBonded, CMR = 31		Green = 05	50 ft (15.2 m) = 050
	CA/C6/C5 NonBonded, CMP = 32		Blue = 06	75 ft (22.9 m) = 075
			Purple = 07	100 ft (30.5 m) = 100
			Gray = 08	
			White = 09	
			Black = 00	
			TIA 606 Color	
			Red = 12	
			Orange = 13	
			Yellow = 14	
			Green = 15	
			Blue = 16	
			Purple = 17	

Crossover Patch Cords Part Number Example:

C501502010 is CAT5E Patch Cord, Bonded-Pair, 4-pair, 24 AWG Solid, CMR, Crossover IEEE, Red, 10 ft (3.0 m)

Performance	Cable	Termination	Standard Color	Length
10GX = CA	10GX Bonded-Pair, Solid, CMR = 21	Crossover T568A-T568B = 4	Red = 02	1 ft (0.3 m) = 001
	10GX Bonded-Pair, Solid, CMP = 22	Crossover IEEE = 5	Yellow = 04	2 ft (0.6 m) = 002
CAT6+ = C6	C6/5 Bonded-Pair, Solid, CMR = 01			3 ft (0.9 m) = 003
CAT5E = C5	C6/5 Bonded-Pair, Solid, CMP = 02			4 ft (1.2 m) = 004
				5 ft (1.5 m) = 005
				6 ft (1.8 m) = 006
				7 ft (2.1 m) = 007
				8 ft (2.4 m) = 008
				9 ft (2.7 m) = 009
				10 ft (3.0 m) = 010
				11 ft (3.4 m) = 011
				12 ft (3.7 m) = 012
				13 ft (4.0 m) = 013
				14 ft (4.3 m) = 014
				15 ft (4.6 m) = 015
				20 ft (6.1 m) = 020
				25 ft (7.6 m) = 025

10GX Pre-Terminated Cabling System

Cable Assemblies, Couplers, Patch Panels

10GX Pre-Terminated Cable Assemblies

The 10GX Pre-Terminated Cabling System delivers rapid deployment coupled with guaranteed Category 6A performance and headroom, without the need for tradeoffs or compromise in performance and reliability. Bringing a new level of ease and convenience to cabling system design, ordering and installation, the system allows users to deploy their high-performance 10 Gigabit networks with optimal speed and efficiency.

Proven modular components are the cornerstone of the system. These include the 10GX Pre-Terminated Cable Assemblies and the 10GX RJ45 Modular Couplers. These components rely on unique enabling technologies: Belden's Bonded-

Pair technologies ensure that the cable assemblies boast exceptional structural stability and unflinching electrical performance; and the patent-pending Dual-Flex design ensures controlled plug/jack mated connection on both sides of the coupler to provide an uninterrupted electrical path for superior connector reliability and transmission performance.

With simple planning, easy ordering and rapid delivery, the 10GX Pre-Terminated Cabling System can reduce installation time and labor costs by as much as 90 percent. In addition, this "green" system provides for plug-and-play installation and component reusability, resulting in lower installed cost and less waste.

10GX IDC System

Connecting Components, Accessories, X-Connect Cable

The Belden 10GX IDC System is a high-performance, space-efficient modular connection system. The system meets the TIA/EIA 568-C.2 standard, plus it is uniquely engineered to deliver unmatched 10G performance – handling 10GBase-T data networking and multimedia applications with headroom to spare.

The 10GX IDC System is extremely flexible in that it accommodates the configuration of large cross-connect systems and the configuration of interconnect systems within racks. Because of its modularity, the system also accommodates future moves, adds and changes (MACs) with ease.

10GX Shielded System Cable Category 6A

Nonbonded-Pair and Bonded-Pair

10GX Shielded System Cable

This 10GX shielded cable delivers performance that goes beyond the ANSI/TIA/EIA 568-C.2 Category 6A standard. When used as the horizontal cable within the Belden IBDN 10GX Shielded System, it provides 625 MHz of proven channel bandwidth and a data rate of 10 Gigabits per second. With a thick, 100% coverage foil shield, your 10 Gb/s of data is protected from harsh EMI environments.

Adding a shield to a high performance Category 6A cable is not as easy as one would think. Any metallic shield changes the electrical performance of the cable, and if the shield is not smooth, that performance becomes unpredictable. Our design utilizes an inner and outer jacket to sandwich the foil into having a smooth surface. This eliminates adverse PSNEXT and RL effects seen with most other 10G cable products.

Applications:

- 10GBASE-T, and any other Ethernet application in high noise environments (EMI)
- 10GBASE-T Full Power Implementation (IEEE 802.3an)
- 10GBASE-T Low Power Implementation (Short Reach Mode) (IEEE 802.3an)
- 1000BASE-T Applications (IEEE 802.3ab)
- Power Over Ethernet Plus - 2 pairs, up to 30 Watts or 4-pairs, up to 60 Watts (IEEE 802.3at)
- Power Over Ethernet - 2 pairs, up to 12.95 Watts (IEEE 802.3af)
- Broadband Video (CATV) and High Speed Internet (DOCSIS) over UTP up to 860 MHz
- High Temperature performance up to 50°C without length de-rating for 1000BASE-T and 100BASE-TX

10GX Shielded Patch Panels and Shielded Modular Jacks

KeyConnect Shielded Patch Panels are robust all-metal modular patch panels that provide a flexible, versatile and high-density termination solution for Data Center and Telecommunications Room installations. The modular KeyConnect Patch Panels are available in 24-port/1U and 48-port/2U and are complete with a ground wire and cable management brackets to guarantee shielding integrity (per TIA-607-B) and neat cable dressing. The KeyConnect Shielded Patch Panels can be configured using 10GX Shielded Modular Jacks or any other KeyConnect modules.

The 10GX Shielded KeyConnect Jack is a rugged tool-less connector designed to be used within the Belden IBDN 10GX Shielded System. Its 2-piece

die-cast housing and its shielding lug provide a reliable shield and 360 degree durable bonding to the cable foil. Its color-coded wire guide speeds up pair placement and terminates all pairs when closing the 2-piece housing.

The excellent 10GX performance exceeds all parameters specified in the TIA Category 6A standard. Its performance characteristics including ANEXT, NEXT, FEXT, Insertion Loss and Return Loss have been set to guarantee transmission performance up to 625 MHz with a 10 dB margin on PSANEXT and PSAACRF. Its keystone footprint makes it compatible with KeyConnect Shielded Patch Panels and with KeyConnect and MediaFlex Workstation Outlets.

10GX Shielded Modular Cords

Bonded-Pair Patch Cords and Pigtails

10GX Shielded Modular Cord

The 10GX Shielded Patch Cords are 4-pair 24 AWG F/UTP modular cords designed to be used within the Belden 10GX Shielded System. Belden has designed the 10GX Modular Cord based on a patent pending plug management bar design which allows for very good control of the internal plug NEXT. The shielded patch cable design offers alien crosstalk performance, while maintaining flexibility. The 10GX Shielded Patch Cord's design features a very small footprint, and is fully compatible with high-density hubs that utilize RJ45 jack connections. The 10GX Shielded

Patch Cords are available in dark colors which match the horizontal cable colors and are also available in TIA/EIA-606 standard (pastel) colors. The cord's unmatched performance exceeds all parameters specified in the Category 6A standard. All performance characteristics have been set to guarantee transmission performance up to 625 MHz.

- Exceeds TIA and ISO transmission and mechanical performance requirements
- Ordering code scheme to customize Bonded-Pair Patch Cord and Pigtail configurations

10GX Shielded Pre-Terminated Cabling System

Cable Assemblies, Couplers, Patch Panels, Cords

The 10GX Shielded Pre-Terminated Cabling System delivers rapid deployment coupled with guaranteed Category 6A performance and headroom, without the need for tradeoffs or compromise in performance and reliability. Bringing a new level of ease and convenience to cabling system design, ordering and installation, the system allows users to deploy their high-performance 10 Gigabit networks with optimal speed and efficiency. Proven modular components are the cornerstone of the system. These include the 10GX Shielded Pre-Terminated Cable Assemblies and the 10GX Shielded RJ45 Modular Couplers. These components rely on unique enabling technologies: Belden's Bonded-

Pair technologies ensure that the cable assemblies boast exceptional structural stability and unflinching electrical performance; and the patent-pending Dual-Flex design ensures controlled plug/jack mated connection on both sides of the coupler to provide an uninterrupted electrical path for superior connector reliability and transmission performance.

With simple planning, easy ordering and rapid delivery, the 10GX Shielded Pre-Terminated Cabling System will drastically reduce installation time and labor cost. In addition, this "green" system provides for plug-and-play installation and component reusability, resulting in lower installation cost and less waste.

Belden offers three beyond-standards Category 6 copper systems to support a variety of price-performance ratios, applications, environments and operational life spans—IBDN 4800 System, IBDN 3600 System and IBDN 2400 System. Each IBDN Category 6 system is comprised of DataTwist Cable with various guaranteed bandwidth levels and application recommendations, preloaded and modular KeyConnect Patch Panels, CAT6+ Modular Jacks and Cat6+ Modular Cords.

IBDN 4800 System is the highest performing Category 6 system available with guaranteed bandwidth to 300 MHz and exceptional signal power and signal-to-noise performance that exceeds TIA/EIA Category 6 requirements.

IBDN 3600 System offers the best price-performance ratio of any end-to-end Category 6 system on the market. With guaranteed performance to 280 MHz, IBDN 3600 System offers headroom beyond the TIA/EIA Category 6 standard.

IBDN 2400 System offers a guaranteed bandwidth of 250 MHz to support enhanced, error-free Category 6 performance for reliable general business applications and transactions.

Belden's 3600 Pre-Terminated Cabling System features proven modular components and an intuitive plug-and-play installation that deliver rapid deployment and guaranteed Category 6 performance and headroom.

Based on proven reliable BIX technology, the space-savings IBDN GigaBIX Category 6 Cross-Connect System offers easy installation and cable management for high-density applications.

With DataTwist 2400 Shielded Cables, Shielded Patch Panels and CAT6+ Shielded Modular Jacks and Cords, Belden also offers an end-to-end Category 6 shielded system that provides better noise immunity to improve data throughput in harsh EMI environments.

DataTwist 4800 UTP Cable, Category 6

Nonbonded-Pair and Bonded-Pair

DataTwist 4800, part of the 4800 System, is a UTP cable engineered specifically to perform well beyond ANSI/TIA/EIA-568-C.2 Category 6 requirements. DataTwist 4800 Cables can be specified in either Nonbonded-Pair design or in Belden's exclusive Bonded-Pair construction. All DataTwist 4800 Cables are designed to provide low Insertion Loss (low signal Attenuation). This characteristic enables increased signal power over a higher range of frequencies. This strong signal translates into maximum headroom and more robust transmission for today's applications as well as a capacity for those of tomorrow's networks. The

higher signal power of DataTwist 4800 Cables also results in a higher PSACR. With this higher ratio, 4800 Cables are able to provide fewer transmission errors and higher data rate capability.

DataTwist 4800 with Bonded-Pair technology is fully characterized with guaranteed performance to 600 MHz. Available in plenum and non-plenum versions, DataTwist 4800 with Bonded-Pair technology provides a greater amount of headroom, enabling the structured cabling system to deliver guaranteed performance even when unforeseen circumstances arise.

DataTwist 3600 Cable, Category 6

Nonbonded-Pair and Bonded-Pair

DataTwist 3600 UTP Cables provide increased bandwidth and signal-to-noise margins. Their smaller diameter and high performance make possible the unique Category 6 networking solution: Belden IBDN 3600 System.

DataTwist 3600 UTP Cables have descending-distance marking for cable length that reduces waste. Matching tip and ring color code for ease of installation. Available in Spool-in-Box packaging for ease of installation, handling, and inventory management.

Features

- Central spline design separates pairs and maintains stable pair position, thus improving crosstalk and impedance/RL performance
- Increased bandwidth and signal-to-noise margins
- Optimized balance of transmission performance for simultaneous parallel transmission protocols
- Size minimized for compactness of installations
- Larger 23 AWG conductors are ideal for PoE and PoE+ applications

DataTwist 2400 Cable, Category 6

Nonbonded-Pair

DataTwist 2400 Cable consists of 4-pair UTP cables that exceed Category 6 requirements as per ANSI/TIA/EIA-568-C.2. When used as the horizontal

cable in the Belden IBDN 2400 System, the channel provides at least 250 MHz of bandwidth.

DataTwist 2400 Cable

MediaTwist Cable

MediaTwist UTP Cable, Category 6

Bonded-Pair

MediaTwist, part of the IBDN 2400 System, is engineered to exceed the ANSI/TIA/EIA-568-C.2 Category 6 requirements. The exceptional physical uniformity of MediaTwist translates into premier electrical performance benefits for users. Available in plenum and non-plenum versions, MediaTwist has taken Bonded-Pair technology a step further. Its unique crescent-shape design ensures that pair-

to-pair movement is minimized during installation. The innovative design of MediaTwist provides stable crosstalk and impedance performance both before and after installation. This results in improved signal integrity and reduced signal radiation, making MediaTwist an excellent choice for your Category 6 cable.

CAT6+ UTP Field-Terminated System

KeyConnect Patch Panels, Category 6

Preloaded and Modular

The KeyConnect Patch Panel Series is a comprehensive line of robust all-metal, preloaded and modular patch panels. The series provides a flexible, versatile and high-density termination solution for Data Center and Telecommunications Room installations. The preloaded KeyConnect Patch Panels are available in 24-port/1U and 48-port/2U configurations with CAT6+ KeyConnect Modular Jacks. Both preloaded versions are available with 2 different alternate cable management and labeling options. The -SCM option has shorter cable management brackets and a cable support bar along the back of the panel. It also comes with clear ID tubes to label the ports. The -LCM option is similar but has regular size cable management brackets. The modular KeyConnect Patch Panels are available in 24-port/1U, 48-port/2U, 72-port/2U and 48-port/1U configurations.

The KeyConnect Patch Panel series also includes the unique AngleFlex Patch Panel available in 24-port/1U and 48-port/2U configurations. Patent-pending removable angled inserts provide intuitive left, right or bi-directional patch cord routing and more efficient switch connection. Angled inserts eliminate the need for horizontal cable management, for a 27% space savings per rack.

The KeyConnect and AngleFlex panels can be configured using CAT6+ KeyConnect Modular Jacks or Multimedia Modules.

The Flex Patch Panel series is available in 24-port/1U and 48-port/2U configurations, and is designed to be populated using MDVO-Style CAT6+ Modular Jacks or Multimedia Modules.

KeyConnect Modular Jacks

CAT6+ KeyConnect Modular Jack

CAT6+ Modular Jacks

KeyConnect and MDVO-Style

The CAT6+ Modular Jack is a punch down UTP connector based on a patented Encapsulated Lead Frame technology that ensures excellent long-term reliability as well as extremely stable transmission performance. They are designed to be used within the Belden IBDN 4800, 3600 and 2400 Systems. The Beyond Category 6 performance exceeds all parameters specified in the Category 6 standard. All performance characteristics have been set to guarantee transmission performance up to 300 MHz and a data-rate of up to 4.8 Gb/s.

The KeyConnect version has a keystone footprint, and is designed to be used with KeyConnect and AngleFlex Patch Panels and with KeyConnect and MediaFlex Workstation Outlets. The MDVO-Style is designed to be used with Flex Patch Panels as well as Interface and MediaFlex Workstation Outlets. The modular jacks can also be mixed and matched with a wide variety of adapters and boxes to suit practically any installation configuration for workstation outlet, consolidation point and telecommunications closet applications.

CAT6+ UTP Field-Terminated System

CAT6+ Modular Cords

Bonded-Pair Patch Cords and Nonbonded-Pair Pigtails

The CAT6+ Series of Bonded-Pair Patch Cords are made with Belden's patented robust design Bonded-Pair cables. These modular cords offer the best combination of transmission performance and physical integrity.

Features

- Made with small diameter Bonded-Pair cable for greater flexibility and higher density installations
- Solid conductors improve attenuation and are needed in long patch cords and pigtails to eliminate the need for cable de-rating in open-office cabling

- Improved strain relief and a flexible boot for optimum protection in high-density installations
- Wrap-around label on each cord for easier product identification and length sorting

Benefits

- Exceeds TIA and ISO transmission and mechanical performance requirements
- Ordering code scheme to customize Bonded-Pair Patch Cord and Pigtail configurations

3600 Pre-Terminated Cabling System

Cable Assemblies, Couplers, Patch Panels

Belden's 3600 Pre-Terminated Cabling System delivers rapid deployment coupled with guaranteed Category 6 performance and headroom, without the need for tradeoffs or compromise in performance and reliability. Bringing a new level of ease and convenience to cabling system design, ordering and installation, the system allows users to deploy their high-performance cabling networks with optimal speed and efficiency.

Proven modular components are the cornerstone of the system. These include the 3600 Pre-Terminated Cable Assemblies and the CAT6+ RJ45 Modular Couplers. These components rely on

unique enabling technologies: Belden's Bonded-Pair technologies ensure that the cable assemblies boast exceptional structural stability and unfailing electrical performance; and the patent-pending plug management bar design which allows for very good control of the internal plug NEXT and superior plug/jack mated-pair performance.

With simple planning, easy ordering and rapid delivery, the 3600 Pre-Terminated Cabling System can reduce installation time and labor costs by as much as 90 percent. In addition, this "green" system provides for plug-and-play installation and component reusability, resulting in lower installed cost and less waste.

GigaBIX IDC System, Category 6 Kits, Components, Patch Cords and Accessories

The Belden IBDN GigaBIX Cross-Connect System takes advantage of the proven reliability of BIX technology to provide high-performance connections for data networks. This uniquely designed system allows for very high termination density, while maintaining optimal ease of administration to accommodate moves, adds and changes.

Advantages of the Belden IBDN GigaBIX Cross-Connect System include easy installation and cable management, coupled with the industry's best performance-to-price ratio for high-density connectivity. The system allows up to 300 pairs to be terminated in a very small area—a real space-saving advantage in today's office environment where real estate is at a premium.

DataTwist 2400 Shielded Cable

DataTwist 2400 Shielded Cable consists of 4-pair F/UTP cables that exceed Category 6 requirements as per ANSI/TIA/EIA-568-C.2. When used as the horizontal cable in the Belden IBDN 2400 Shielded System, the channel provides at least 250 MHz

of bandwidth. DataTwist 2400 F/UTP shielded cable has a thick, 100% coverage foil shield. This shield protects your system from harsh EMI environments improving your data throughput.

CAT6+ Shielded Patch Panels and Shielded Modular Jacks

KeyConnect and Modular

KeyConnect Shielded Patch Panels are robust all-metal modular patch panels that provide a flexible, versatile and high-density termination solution for Data Center and Telecommunications Room installations. The modular KeyConnect Patch Panels are available in 24-port/1U and 48-port/2U and are complete with a ground wire and cable management brackets to guarantee shielding integrity (per TIA-607-B) and neat cable dressing. The KeyConnect Shielded Patch Panels can be configured using 10GX Shielded Modular Jacks or any other KeyConnect modules.

The CAT6+ Shielded KeyConnect Modular Jack is a rugged tool-less connector designed to be used within the Belden 2400 Shielded System. Its 2-piece

die-cast housing and its shielding lug provide a reliable shield and 360 degree durable bonding to the cable foil. Its color-coded wire guide speeds up pair placement and terminates all pairs when closing the 2-piece housing.

The excellent CAT6+ performance exceeds all parameters specified in the TIA Category 6 standard. Its performance characteristics including ANEXT, NEXT, FEXT, Insertion Loss and Return Loss have been set to guarantee transmission performance up to 250 MHz with a 10 dB margin on PSANEXT and PSAACRF. Its keystone footprint makes it compatible with KeyConnect Shielded Patch Panels and with KeyConnect and MediaFlex Workstation Outlets.

CAT6+ Shielded Modular Cords

Patch Cords and Pigtails

CAT6+ Shielded Modular Cord

The CAT6+ Shielded Modular Cords are 4-pair 24 AWG F/UTP modular cords designed to be used within the Belden IBDN 2400 Shielded System. These modular cords offer the best combination of transmission performance and shielding integrity.

Features

- Made with small diameter for greater flexibility and higher density installations
- Solid conductors 24 AWG improve attenuation and are needed in long patch cords and pigtails to

eliminate the need for cable de-rating in open-office cabling

- Improved strain relief and a flexible boot for optimum protection in high-density installations
- Wrap-around label on each cord for easier product identification and length sorting

Benefits

- Exceeds TIA transmission and mechanical performance requirements
- Excellent shielding integrity per TIA-607-B

The IBDN 1200 System is the best performing Category 5e system available, exceeding all requirements for Category 5e performance with guaranteed bandwidth to 160 MHz. The system is comprised of Nonbonded-Pair or Bonded-Pair DataTwist 1200 Cable, KeyConnect Patch Panels and CAT5E Modular Jacks and Cords. A BIX Cross-Connect System, 110 Cross-Connect System and end-to-end shielded system are also available as part of Belden's comprehensive Category 5e offering. The IBDN 1200 System features several Belden innovations that ease installation and management, ensure maximum performance and support a variety of environments.

DataTwist 1200 Bonded-Pair Enhanced
Category 5e Cable is available in plenum and non-plenum versions. Using patented Bonded-Pair technology, DataTwist 1200 cable offers superior electrical performance that exceeds Category 5e performance.

DataTwist 1200 Banana Peel® Enhanced
Category 5e Cable uses a unique patented design that bundles six DataTwist Bonded-Pair Category 5e Cables to a center spline, offering a smaller size for easier termination and installation.

CAT5E HD Patch Panels combine punch down connectors with standard modular jacks to speed installation. CAT5E HD Patch Boxes, available in BIX and 110 configurations, hold a 12-port universal connector module in a compact and robust metal enclosure.

CAT5E KeyConnect Modular Jacks feature patented Encapsulated Lead Frame technology that offers excellent long-term reliability as well as extremely stable transmission performance.

DataTwist 1200 UTP Cable

DataTwist 1200 Cable, Category 5e Nonbonded-Pair

DataTwist 1200 Cable Series consists of 4-pair UTP cables that exceed the Category 5e requirements as per ANSI/TIA/EIA-568-C.2 Category 5e

standard. When used as the horizontal cable in the Belden IBDN 1200 System, the channel provides 160 MHz of bandwidth.

DataTwist® 1200 Cable, Category 5e Bonded-Pair (DT350)

DataTwist 1200 Bonded-Pair Enhanced Category 5e Cable provides the user with superior electrical performance both "on-the-reel" and in the wall. DataTwist 1200 Cables are available in plenum and non-plenum versions. They ensure superior Installable Performance® by utilizing the patented Bonded-Pair design. They exceed the full range of ANSI/TIA/EIA-568-C.2 Category 5e performance criteria, both electrically and physically.

DataTwist 1200 Banana Peel® Enhanced Category 5e Cable is a patented design. This unique design effectively bundles six DataTwist 1200 Bonded-Pair Category 5e Cables to a center spline, eliminating the need for an overall jacket. The elimination of the outer jacket means simpler termination by peeling the cables directly off the spline as well as a decrease in size and the relative bend radius.

CAT5E HD Patch Panels

KeyConnect Patch Panels (Empty)

AngleFlex Patch Panels

Flex Patch Panel, 24-port, 1U, Black (Empty)

KeyConnect Patch Panels, Category 5e Preloaded and Modular

The CAT5E HD Patch Panels are robust and installer-friendly products by design, combining punch down connectors with standard modular jacks. The 12-port connector modules are available in both BIX and 110 Insulation Displacement Connection (IDC) options. CAT5E HD Patch Panels offer Category 5e performance and are designed to be used with the Belden IBDN 1200 System.

The KeyConnect Patch Panels are a comprehensive line of robust all-metal, preloaded and modular patch panels. The series provides a flexible,

versatile and high-density termination solution for Data Center and Telecommunications Room installations.

The modular KeyConnect Patch Panels are available in 24-port/1U, 48-port/2U, 72-port/2U and 48-port/1U configurations. Belden's unique KeyConnect AngleFlex Patch Panels are also available in 24-port/1U and 48-port/2U and offer better port-density and patch cord manageability. These panels can be configured using any KeyConnect UTP or Multimedia Modules.

Patch Panels, Category 5e (continued)

HD Patch Boxes

The CAT5E HD Patch Boxes are available in BIX and 110 configurations and hold one 12-port universal connector module in a compact and robust metal enclosure. The patch box features a hinged cover and support brackets to secure cables and maintain patch cord bend radius.

An MDVO Patch Box is also available that can be custom configured in the field using up to 12 MDVO-Style Modular Jacks or MDVO Multimedia Modules. Modules are ordered separately.

CAT5E KeyConnect Modular Jack

CAT5E Modular Jacks

KeyConnect and MDVO-Style

The CAT5E Modular Jack is a punch down UTP connector based on a patented Encapsulated Lead Frame technology that ensures excellent long-term reliability as well as extremely stable transmission performance. They are designed to be used within the Belden IBDN 1200 System. The Category 5e performance exceeds all parameters specified in the Category 5e standard. All performance characteristics have been set to guarantee transmission performance up to 160 MHz and a data-rate of up to 1.2 Gb/s.

The KeyConnect version has a keystone footprint, and is designed to be used with KeyConnect and AngleFlex Patch Panels and with KeyConnect and MediaFlex Workstation Outlets. The MDVO-Style is designed to be used with Flex Patch Panels as well as Interface and MediaFlex Workstation Outlets. The modular jacks can also be mixed and matched with a wide variety of adapters and boxes to suit practically any installation configuration for workstation outlet, consolidation point and telecommunications closet applications.

CAT5E EZ-MDVO Modular Jacks

KeyConnect and MDVO-Style

The EZ-MDVO Module is built with a patented lead frame design and encapsulated insulation displacement contacts, ensuring reliable connections and performance well above Category 5e standards. The EZ-MDVO module termination cap is what is so unique about this product. It allows for a simple and fast “press-fit” installation while ensuring consistent wire termination every time it is snap-locked. The module termination cap is color-coded to facilitate wire arrangement and speed up installation time. The termination cap is printed with the T568A/B color-codes.

The KeyConnect version has a keystone footprint, and is designed to be used with KeyConnect and AngleFlex Patch Panels and with KeyConnect and MediaFlex Workstation Outlets. The MDVO-Style is designed to be used with Flex Patch Panels as well as Interface and MediaFlex Workstation Outlets. The modular jacks can also be mixed and matched with a wide variety of adapters and boxes to suit practically any installation configuration for workstation outlet, consolidation point and telecommunications closet applications.

CAT5E Patch Cords

CAT5E Modular Cords

Bonded-Pair Cords and Nonbonded-Pair Pigtails

The CAT5E Series of Patch Cords are made with Belden's patented robust design Bonded-Pair cables. These modular cords offer the best combination of transmission performance and physical integrity.

Features

- Made with small diameter Bonded-Pair cable for greater flexibility and higher density installations
- Solid conductors improve attenuation and are needed in long patch cords and pigtails to eliminate the need for cable de-rating in open-office cabling

- Improved strain relief and a flexible boot for optimum protection in high-density installations
- Wrap-around label on each cord for easier product identification and length sorting

Benefits

- Exceeds TIA and ISO transmission and mechanical performance requirements
- Ordering code scheme to customize Bonded-Pair Patch Cord and Pigtail configurations

BIX Cross-Connect System

Components, Patch Cords, Wires and Accessories

The Belden IBDN BIX Cross-Connect System takes advantage of the proven reliability of BIX technology to provide high-performance connections for voice and data networks. This uniquely designed system allows for very high termination density, while maintaining optimal ease of administration to accommodate MACs.

Advantages of the Belden IBDN BIX Cross-Connect System include easy installation and cable management, coupled with the industry's best performance-to-price ratio for high-density connectivity. The system allows for multiple mounting options of various connectors used in voice and data distribution systems.

DataTwist 1200 Shielded Cable, Category 5e

Nonbonded-Pair

DataTwist 1200 Shielded Cable consists of 4-pair F/UTP cables that exceed the Category 5e requirements as per ANSI/TIA/EIA-568-C.2 Category 5e standard. When used as the horizontal cable in the Belden IBDN 1200

Shielded System, the channel provides 160 MHz of bandwidth. DataTwist 1200 F/UTP shielded cable has a thick, 100% coverage foil shield. This shield protects your system from harsh EMI environments improving your data throughput.

Data Twist 1200 Shielded Cable

CAT5E Shielded Field-Terminated System

CAT5E Shielded Patch Panels and Shielded Modular Jacks KeyConnect and Modular

Shielded Modular Patch Panel (Empty)

KeyConnect Shielded Patch Panels are robust all-metal modular patch panels that provide a flexible, versatile and high-density termination solution for Data Center and Telecommunications Room installations. The modular KeyConnect Patch Panels are available in 24-port/1U and 48-port/2U and are complete with a ground wire and cable management brackets to guarantee shielding integrity (per TIA-607-B) and neat cable dressing. The KeyConnect Shielded Patch Panels can be configured using 10GX Shielded Modular Jacks or any other KeyConnect modules.

The CAT5E Shielded KeyConnect Modular Jack is a rugged tool-less connector designed to be used within the Belden IBDN 1200 Shielded System.

Its 2-piece die-cast housing and its shielding lug provide a reliable shield and 360 degree durable bonding to the cable foil. Its color-coded wire guide speeds up pair placement and terminates all pairs when closing the 2-piece housing.

The excellent CAT5E performance exceeds all parameters specified in the TIA Category 5e standard. Its performance characteristics including ANEXT, NEXT, FEXT, Insertion Loss and Return Loss have been set to guarantee transmission performance up to 160 MHz with a 10 dB margin on PSANEXT and PSAACRF. Its keystone footprint makes it compatible with KeyConnect Shielded Patch Panels and with KeyConnect and MediaFlex Workstation Outlets.

CAT5E Shielded Modular Cords

Patch Cords and Pigtails

The CAT5E Shielded Modular Cords are 4-pair 24 AWG F/UTP modular cords designed to be used within the Belden IBDN 1200 Shielded System. These modular cords offer the best combination of transmission performance and shielding integrity.

Features

- Made with small diameter for greater flexibility and higher density installations
- Solid conductors 24 AWG improve attenuation and are needed in long patch cords and pigtails to eliminate the need for cable de-rating in open-office cabling

- Improved strain relief and a flexible boot for optimum protection in high-density installations
- Wrap-around label on each cord for easier product identification and length sorting

Benefits

- Exceeds TIA transmission and mechanical performance requirements
- Excellent shielding integrity per TIA-607-B

Belden offers a wide variety of workstation outlet systems designed for maximum flexibility, durability, aesthetics and manageability. These systems are available using Belden KeyConnect modularity, MediaFlex flexibility and MDVO-Style options. They come in a wide range of styles, colors and configurations, including single-gang and double-gang faceplates, stainless steel faceplates, adapters and boxes and multimedia outlets and inserts. Several innovative tools and accessories that ease termination and simplify network administration are also available.

KeyConnect Series feature a variety of faceplates, adapters and boxes that are compatible with all KeyConnect UTP and Multimedia Modules. Each modular component of the KeyConnect Workstation Outlet System seamlessly fits together to accommodate any surface mount, furniture or standard electrical plate outlet installation.

MediaFlex Series include a full line of modular faceplates, adapter boxes and inserts that offer the ultimate flexibility in configuring multimedia workstation outlets. They feature a front access design that allows inserts to be easily snapped in and out of openings for fast installation and upgrades.

MDVO Outlet Systems include a wide range of flush and angled entry faceplates, surface adapter boxes, multimedia outlet boxes, multi-user outlet boxes and modular furniture adapters that accept MDVO-Style Modules to support diverse configurations of voice, data and multimedia applications.

The LableFlex Solution simplifies network management by enabling installers to quickly produce application specific labels for most Belden IBDN products, including Modular Jack Connectors, Cross-Connect Systems, Patch Panels, KeyConnect series, MediaFlex series and cable applications.

KeyConnect Faceplates

Compatible with all KeyConnect UTP and Multimedia Modules, KeyConnect Faceplates are designed for maximum flexibility, durability, aesthetics and manageability. They are available in a variety of styles, colors and port configurations to meet all work area outlet application needs, and they provide for easy outlet identification.

Features & Benefits:

- KeyConnect Faceplates are compatible with all KeyConnect jacks and multimedia modules
- KeyConnect Faceplates are available in almond and electrical white to suit any office decor

- Fire-retardant plastic with UV stabilizer for protection against color degradation
- Top and bottom labeling windows for easy outlet identification
- Compatible with LabelFlex labeling solution
- KeyConnect Faceplates are available in stainless steel finish for institutional applications
- KeyConnect Faceplates are available with mounting studs for wall-mount phone installation
- Available in stainless steel and white plastic

Workstation Outlets (continued) KeyConnect Adapters and Boxes

KeyConnect Adapters and Boxes in various styles, sizes and colors provide flexible surface mount, modular furniture and standard electrical plate outlet installation, including high-density workstation outlets.

Features & Benefits:

- KeyConnect Adapters available in Decora and 106 styles for use with standard electrical plates
- Available in Decora-style 2, 4 and 6-port and 106-style 2 and 4-port configurations for design flexibility
- KeyConnect Modular Furniture Adapters available in 3 and 4-port configurations for high-density workstation outlets in office furniture

- KeyConnect Adapters available in almond, electrical white and black to match electrical plates and suit any office decor
- KeyConnect Boxes available in 1, 2, 4 and 6-port configurations for design flexibility
- KeyConnect Boxes equipped with port shutters to provide dust protection to UTP jacks
- Fire-retardant plastic with UV stabilizer for protection against color degradation
- KeyConnect Adapters are compatible with all KeyConnect UTP and Multimedia Modules

MediaFlex Faceplate Kits

The MediaFlex Faceplate Kits are offered for both KeyConnect and for MDVO-Style Modules.

The MediaFlex Faceplate Kit for KeyConnect Modules offers flexibility in configuring multimedia workstation outlets for current and future network needs. The front access design of the outlets offers easy installation and upgrades while

multiple colors, Single-gang and Double-gang configurations and labeling capabilities meet work area aesthetics, density and identification needs.

The MDVO pre-configured MediaFlex Faceplate Kits include a plate, flush MDVO-style inserts, filler inserts, MDVO blank, labeling window covers, labeling paper and all necessary mounting screws.

AX101777 Labeling Window Cover for MediaFlex Plates

AX101874 MediaFlex Adapter Box, Double-gang

MediaFlex Plates are one part of the comprehensive line of plates and inserts that snap together to create a full line of modular workstation outlets.

MediaFlex Plates can be mounted over standard NEMA type outlet boxes and rings to provide support for a variety of MediaFlex Adapters and Inserts. The fully modular construction combined with the front access design provides extensive configuration flexibility for current and future network needs. MediaFlex Plates are available in Single-gang and Double-gang configurations.

The Double-gang faceplate comes with a stand-off ring included in the package. This ring allows for easy mounting with virtually any industry electrical box or mud/adaptor rings, therefore providing added installation flexibility.

Each plate has the capacity of up to 6 ports per Single-gang and 12 ports per Double-gang.

MediaFlex Surface Adapter Boxes can be mounted over standard NEMA type outlet boxes and rings to provide support for the MediaFlex plates. The MediaFlex Surface Adapter Boxes are available as a Double gang configuration. The double gang box allows more room for cable management and bend radius control.

Workstation Outlets (continued)

MediaFlex Inserts

MediaFlex Module Inserts along with MediaFlex Multimedia Inserts and MediaFlex Filler Inserts allow for the easy configuration of outlets. All inserts are front loaded and easily snapped in and out of the MediaFlex Plates for simple installation and maintenance. MediaFlex Module Inserts are available in a 2-port configuration in both Flush and Angled versions for KeyConnect-Style and

MDVO-Style Modules. The inserts are two units high for the flush version and three units high for the angled version. Therefore three flush inserts or two angled inserts are required to fully populate a Single-gang MediaFlex Plate.

MediaFlex Filler Inserts are used to fill the unused spaces in low density workstation outlets. They are available in one unit and two unit sizes.

Workstation Outlets (continued) Interface Plates, MDVO Faceplates

Interface Plates combine flexibility and ease of use in work area installations. They are designed to accept the EZ-MDVO and other MDVO-Style Modules, UTP modules as well as all the MDVO multimedia modules. The Interface Plates are available in Single-gang and can accept up to 6 modules. They also have labeling capabilities using built-in labeling windows. The faceplates can be attached to standard electrical boxes or wall-mounting hardware for flush-mount installations. The faceplates can also fit over the Interface Adapter Boxes for surface mount installations.

The MDVO Angled Entry Faceplate offers better patch cord protection than traditional faceplates and optimizes patch cord bend radius control. The MDVO Angled Entry Faceplate can accept up to four EZ-MDVO or MDVO Multimedia Modules. The faceplate can be attached to standard electrical boxes or wall-mounting hardware for flush-mount installations. The faceplate can also fit over the Interface Surface Adapter Box for surface mount installations.

AX101474 Interface/MDVO Surface Adapter Box

The Interface/MDVO Surface Adapter Box allows surface mounting of Interface Plates as well as MDVO Flush and Angled entry faceplates. The box can be mounted on any flat surface or can be attached to standard electrical boxes or wall-mounting hardware for additional storage space ordered separately.

The MDVO 106 Adapters are designed for installations using standard NEMA electrical-style

faceplates also referred to as 106-type or duplex wall plates.

The MDVO Deco Adapter is designed for installations using Decora style wall plates.

MDVO Modular Furniture Adapters are the ideal outlet adapters for open office furniture applications.

Workstation Outlets (continued) Multimedia Outlet Boxes and Modules

The MDVO Multimedia Outlet Box brings unique versatility for multimedia work area installations. The box design provides cable management and helps maintain cable bend radius. The outlet box's low profile design and side-entry offers better protection for patch cords. The outlet box can accept up to six EZ-MDVO, MDVO-Style Jacks or MDVO Multimedia Modules or three SC Duplex adapters. The MDVO Multimedia Outlet Box can be mounted directly on the wall or attached to standard electrical boxes. Included with the MDVO Multimedia box are three SC Duplex Mounting bezels and three MDVO Adapters.

MDVO Multimedia Modules address audio/video and fiber applications. Fiber modules are available for LC Duplex, SC Simplex, SC Duplex and ST Compatible for multimode and single-mode connections. The SC Duplex Adapter is a fiber adapter sleeve with flanges that mounts into the SC Duplex mounting bezel (included in the MDVO Multimedia Outlet box). Audio/video modules are available for SVHS, RCA, BNC and Video F connection.

Workstation Outlets (continued)

Multi-User Outlet Box, CAT5E BIX DVO Outlet

AX100222 Multi-User Outlet Box, shown here with modules

The Multi-User Outlet Box design allows for mixed media installations with a choice of connection strips. The box can accept either one or two 12-port MDVO Adapter Strips, CAT5E Connector Module Strips (BIX or 110), or a combination of both for a maximum of 24 connections.

The CAT5E BIX DVO Workstation Outlets are robust and installer-friendly products, combining punch-down connectors with standard modular jacks.

The outlet's unique, completely enclosed housing protects the connectors and allows the wires to be front-terminated on BIX Insulation Displacement Connectors (IDC). The snap-on cover plate allows easy access and eliminates visible mounting screws.

CAT5E BIX DVO Workstation Outlets offer headroom over the Category 5e cabling standard.

Workstation Outlets (continued) Accessories

MDVO Blank Inserts can be used in any MediaFlex outlets, Interface plates, MDVO faceplates, adapters or boxes to fill in unused ports.

The Colored Bezels are plastic inserts that fit over the face of MDVO-Style Modules to modify their color. They are particularly useful in installations where the churn rate is high and color identification of outlets is critical (ex.: segmented network with security levels). They also contribute to simplifying the management of the cabling infrastructure by using only one color of module for Moves, Adds and Changes (MACs).

ID Tabs are color-coded identification caps that can be inserted over the MDVO-Style Modules. The ID tabs are available as blank, data or voice coded. They are available in eleven colors to facilitate identification and to match modern office decor. The flexible identification cap also acts as a protective cover eliminating exposure to dust and other contaminants when the module is not in use.

KeyConnect-Style Accessories include blank inserts available in almond, white and black as well as Dust Covers in clear plastic to protect unused ports.

Workstation Outlets (continued) Tools

AX100749 IBDN 110 Connecting Tool

The IBDN 110 Connecting Tool is a no-impact connecting tool used to terminate cables, pigtails or cross-connect wires on any KeyConnect module or 110 product. The IBDN 110 Tool is a spring-activated hand tool. A single forward movement will seat the wire into the IDC clip and cut off the excess wire. The tool will terminate 22, 24 and 26-AWG plastic insulated solid copper conductors.

The Bonded-Pair Cable Preparation Tool makes it faster and easier to prepare cables for connector termination. This tool is ideal for use with Belden Bonded-Pair cables, providing special features that help separate twisted pairs. It can also be used to prepare any unbonded-pair cable for installation.

The Termination Station is an ergonomically designed holder that provides stability to the KeyConnect Module during the termination process. The station has pockets with locking features that steadily holds either MDVO-style or KeyConnect-Style Modules or MediaFlex Inserts

during pair placement and wire termination. Cable retainers on each end of the station will secure and hold cables during the pair placements process. The flat bottom surface will provide the required stability to safely terminate the modules. The tool is made of very durable plastic and its low profile makes it an easy tool to use and carry.

The Outlet Release Tool is a very convenient tool for servicing the MediaFlex and Interface outlets. Its bent tip allows for easy front removal of MediaFlex inserts, especially when used in Angled Entry plates. It is also very useful to extract KeyConnect Modules from miscellaneous mounting hardware.

The Patch Cord Tool allows to connect and disconnect RJ45 patch cords installed in very high-density environments (48-port, 1U patch panels and high-density networking equipment).

Labels

LabelFlex

The LabelFlex solution is aimed at simplifying network management. Using the labeling system (software and label types), the installer can rapidly produce quality, application specific labels for most Belden IBDN products in a fraction of the time taken by traditional methods.

The range of Belden IBDN products covered by the labeling system is:

- 110 Cross-Connect System
 - KeyConnect Patch Panels
 - Flex Patch Panels
 - Workstation Outlets
 - MediaFlex Faceplates series
 - Cable Applications, 4-pair and 25-pair
- GigaBIX and BIX Cross-Connect Systems
 - BIX Modular Jack Connectors

Miscellaneous Cables	63-71
DataTwist 6, 5e and 5 F/UTP Shielded Cable	64
DataTwist 5e Cable	65
DataTwist 5e Outdoor Cable	66
DataTwist 1200 UTP Siamese Cable	66
Limited Combustible Cable	67
DataTwist Outside Plant Cable	68
IBDN Plus Backbone Indoor Cable	68
DataTwist 3 UTP and D-Inside Wire and Backbone Indoor Cable	69
Patch Cable	70-71

Belden understands that not every application is the same and unique situations and environments may call for a different cable solution. That's why our Copper Solutions Catalog also includes a variety of additional Belden quality cables to meet specific customer needs. From shielded, bundled Siamese and limited combustible cables, to outside plant, multi-pair and patch cables, Belden has the copper cable you need for a variety of voice, data and control applications.

DataTwist Category 6, 5e and 5 Pair Cables are available in shielded (F/UTP) plenum and non-plenum varieties with several color and packaging options to ease installation, handling and identification.

DataTwist 1200 Bonded-Pair UTP Siamese Cables come bundled with two 4-pair cables for easy break-out and identification.

Limited Combustible Cable is a plenum cable that provides the ultimate in fire and smoke safety. These cables are specifically engineered to meet NFPA requirements for a Limited Combustible cable while offering beyond-standards performance for Category 6 and 5e.

DataTwist Outside Plant (OSP) Cables are available in Category 6 and Category 5e cables and feature a thick polyethylene jacket for better moisture and cut-through resistance.

Backbone Indoor Cables are available in IBDN Plus 25-pair Category 5e backbone cables for high-speed applications or in DataTwist Category 3 UTP multi-pair cables, including up to 300-pair count cables for large voice communication systems.

DataTwist 5e F/UTP

DataTwist 6, 5e and 5 F/UTP Shielded Cable Nonbonded-Pair

DataTwist® 6, 5e and 5 F/UTP shielded cables have thick, 100% coverage foil shields that protect systems from harsh EMI environments which improves data throughput.

DataTwist 6, and 5e Shielded Cables consist of 4-pair F/UTP cables that meet or exceed ANSI/TIA/EIA-568-C.2's requirements for Category 6 and 5e.

DataTwist 5 meets or exceeds ANSI/TIA/EIA-568-B.2's requirements for Category 5.

DataTwist 5e Cable, Category 5e

Nonbonded-Pair

DataTwist® 5e Cables are easy to install and offer all the performance you need to meet ANSI/TIA/EIA 568-C.2 Category 5e standards. DataTwist 5e Cables are available in plenum and non-plenum versions and several color and packaging options to

ease installation, handling, and identification. Made to the highest quality standards in the industry, DataTwist 5e Cables support all applications that operate using Category 5e standards.

DataTwist 1200 Siamese Cable

DataTwist 1200 UTP Siamese Cable, Category 5e

Bonded-Pair (DT350)

DataTwist® 1200 Bonded-Pair provides the user with superior electrical performance both "on-the-reel" and in the wall. DataTwist 1200 Bonded-Pair Cables are available in plenum and non-plenum versions. They ensure superior Installable Performance® by utilizing the patented

Bonded-Pair design. They exceed the full range of industry performance criteria, both electrically and physically. DataTwist 1200 Bonded-Pair Enhanced Category 5e Cable sets a new precedent for cabling with confidence.

Limited Combustible Cable, Category 6 and Category 5e

Nonbonded-Pair and Bonded-Pair

DataTwist® Limited Combustible Category 6 Cable is a revolutionary UTP cable engineered specifically to meet the NFPA requirements for a Limited Combustible cable and perform beyond requirements per ANSI/TIA/EIA-568-C.2. Available

only in a plenum version, the DataTwist Limited Combustible Cable is the next generation of cable technology - providing the ultimate in fire and smoke safety.

DataTwist 6 Limited Combustible Cable

DataTwist Outside Plant, Gel-filled

DataTwist 6 and 5e Outside Plant Cable (OSP), Category 6 and Category 5e Nonbonded-Pair

DataTwist Category 6 and 5e Outside Plant (OSP) cables are 4-pair products and are 100% gel-filled with a non-sticky PP compound that is easy to remove when terminating. Each product

also has a thick polyethylene jacket for better moisture and cut through resistance. DataTwist OSP products exceed Category 6 or Category 5e requirements as per ANSI/TIA/EIA-568-C.2.

DataTwist 3 UTP and D-Inside Wire and Backbone Indoor Cable, Category 3

Nonbonded-Pair

DataTwist® 3 Cable is a high value UTP cable engineered specifically to perform to Category 3 requirements per ANSI/TIA/EIA-568-C.2. DataTwist 3, D-Inside Wire, D-Flex Plenum and the ATMM Cable Series are rugged multi-pair

cable series that meet and exceed ANSI/TIA/EIA-568-C.2 and CSA T529-95 specifications for Category 3 transmission characteristics and are perfect for use in networking and communication systems.

D-Inside Series Riser Cable

Miscellaneous Cables

DataTwist Patch Cable

Patch Cable, Category 6 and 5e Nonbonded-Pair and Bonded-Pair

DataTwist Patch cables are flexible 4-pair products designed to be used in the work area, between patch panels, or as equipment cords. Whether Category 6 or 5e these products exceed Category 6 or Category 5e requirements as per ANSI/TIA/EIA-568-C.2.

Our high-end products, 1752A and 1875GB, are the premier patch cable products in the industry.

Bonded-Pair technology is used to give these flexible cables rock solid return loss performance when flexed or moved. Bonded-Pairs also improve the cable's balance which reduces the effects of noisy environments. These products also incorporate fused stranded conductors. Fusing the strands helps ensure that ambient moisture/humidity will not affect your system's insertion loss.

Copper Pre-Term Made Easy

Pre-Terminated Copper
Cabling Solutions

- **EASY** to Configure
- **EASY** to Order
- **EASY** to Install

Now Available!
10GX Shielded
Pre-Term System
